CAPABILITY STATEMENT

Brito Consulting

SAP ILM & Data Archiving

Neehal Brito | Senior SAP ILM & Data Archiving Architect

17+ years in one discipline. Independent specialist serving commercial and federal SAP landscapes. Based in Orlando, Florida. Remote, nationwide (United States). Active U.S. Government security clearance. Records and Information Management certified.

Core capabilities

Data Volume Assessment: DB02 and TAANA growth analysis, archiving potential by object, and prioritized footprint-reduction roadmaps.

Data Archiving: ADK (Archive Development Kit), SARA (Archive Administration) and SARI (Archive Information System) across FI/CO, MM, SD, HR/Payroll and IDOC; archive read-access, job scheduling, reconciliation and integrity validation.

SAP ILM (Information Lifecycle Management) & Retention: Audit Areas, Policies and IRM (Information Retention Manager) Rules; Legal Hold, Blocking & Deletion, End-of-Purpose checks and IRF (Information Retrieval Framework). Retention mandates translated into system configuration.

Decommissioning & Carve-Out: ILM Retention Warehouse, Context Data Extractor, legacy retirement and separated archive stores for divested entities.

Selected past performance

Fortune 50 retailer: ~25% HANA memory footprint reduction, deferring $1M+ in hardware upgrades; 5M+ archived documents migrated with zero data loss.

U.S. federal defense logistics: 2.5 TB archived under a sustained DVM (Data Volume Management) program; 100% compliant with DoD federal retention mandates and immutable 25+ year policies.

Global technology distributor: 100% data-segregation accuracy within a 4-month divestiture window; 30+ archiving objects deployed across two entities.

Global pharmaceutical manufacturer: Validated legacy SAP decommissioning into a secure ILM Retention Warehouse under FDA/GxP requirements.

Federal readiness & delivery

Classified and unclassified environment experience. DISA PII and DISA Cyber Security trained. Delivery covers assessment, design, bounded non-production pilot, production rollout, and an operating model the client team can run.
